

RECYCLING SAVES ENERGY

Why do we care?

Recycling uses **LESS** energy

So **FEWER** fossil fuels are burned

which **REDUCES** carbon dioxide in the atmosphere

and **DECREASES** greenhouse gases

which **DECREASES** pollution in our atmosphere.

Using recycled scraps to make aluminum cans uses **95%** **LESS** energy than making cans from raw material.

It takes **75%** less energy to make recycled steel than steel produced from raw materials.
